Resolved Issues

The following issues apply to SMART Board Software 9.7 or SMART Board Software 9.7 SP1 on the Mac OS X operating system only.

- If you have Senteo assessment software installed, Senteo assessment software marks some students as having skipped a question even though they haven't.
- If you attempt to select, manipulate or control Adobe® Flash® file and Flash video file objects on the Notebook™ page in Full Screen view, the objects disappear.
- The Start Center doesn't display correctly.
- The SMART Keyboard doesn't display the options for changing the keyboard style, customizing the settings or accessing the online Help system unless you press the upper left corner of the SMART Keyboard.
- If you close a Notebook file on an interactive whiteboard, you may not be able to select other items on the desktop. This issue doesn't apply if you close a Notebook file using a mouse. The Notebook file may also incorrectly retain focus under other circumstances.
- If you print a Notebook file, the print-out omits the first page.
- The Gallery's Check for Updates option isn't available.
- The installation of SMART Board Software 9.7 or SMART Board Software 9.7 (SP1) may fail when you install the Gallery.
