

The Handwriting Recognition Language in SMART Notebook Software 10 Is Different than Your Mac Operating System Software's Language

Applies to: SMART Notebook software 9.7 and 10 for Mac computers

Issue

SMART Notebook software's handwriting recognition language doesn't change when you change your operating system software's language.

Cause

The language settings for Mac operating system software and SMART Notebook's handwriting recognition are separate. SMART Notebook uses the Ink Preferences setting for handwriting recognition with Mac computers.

Solution

Change your operating system's Ink setting in System Preferences.

To change the Ink setting in System Preferences

1. Select **Apple Menu > System Preferences**.

The *System Preferences* dialog box appears.

2. Press **Ink**.

The *Ink* dialog box appears.

3. Select the **Language** tab.

4. Select your preferred language from the **Language** menu.

NOTE: Mac operating system software's Ink settings support English, French and German.

5. Close the *Ink* dialog box.
