Release Notes

SMART Notebook Software 10

About These Release Notes

These release notes document changes in SMART Notebook software 10 and its service packs.

Product Information

SMART Notebook collaborative learning software provides the tools to create and deliver engaging, interactive learning experiences across grades, subjects and learning styles. Version 10 is powerful, intuitive and easy to use with Windows® operating systems, Mac OS X operating system software and Linux® operating systems.

Extraordinary made simple™

SMART™

SMART Notebook 10 SP3.5

Computer Requirements

Windows Operating Systems

- Pentium® III 750 MHz processor or faster recommended
- 512 MB of RAM (1 GB recommended)
- 1 GB free hard disk space for minimum installation (2 GB for full installation with Gallery collections)
- Windows XP or Windows Vista® operating system
- Internet Explorer® Internet browser 6.0 or later
- Adobe® Flash® Player 8 or later
- Windows Media® Player 9 or later for SMART Recorder
- Microsoft® DirectX® technology interface 8.1 or later for SMART Video Player

Mac OS X Operating System Software

- PowerPC® G4 or G5 processors or Intel® processors (universal binary)
1 GHz processor or faster recommended
- 512 MB of RAM
- 1 GB of free hard disk space for minimum installation (2 GB for full installation with Gallery collections)
- Mac OS X operating system software 10.4.11 or 10.5.x
- Safari® application program 1.3.2 or later
- Adobe Flash Player 10 or later

Linux Operating Systems (No Changes)

- Pentium II 450 MHz processor
- 128 MB of RAM (256 MB recommended)
- 185 MB of free hard disk space for minimum installation (800 MB for full installation with Gallery collections)
- Linux kernel version 2.6 or later (2.6.11 or later to use a SMART Podium DT770 interactive pen display)
- X Window System™ version 11 release 6 (X11R6) or later (must support XRender and Xinerama™)
- glibc 2.3.3 (gcc 3.4.2)

- libstdc++6
- GNOME™ 2.8.0 or KDE® 3.3 libraries or later (recommended)
- Red Hat® Enterprise Linux 5.1, openSUSE® 10.3, Debian® 4.0 (Etch) r3, Ubuntu® 6.06 LTS or Fedora™ Core 9

i NOTE

For complete specifications, see [document 128254](#).

Current Versions

Operating System	Current Version of SMART Notebook Software
Windows operating systems	Version 10 SP3.5
Mac OS X operating system software	Version 10 SP3.5
Linux operating systems	Version 10

SMART Notebook 10 SP3.5 Highlights

SMART Notebook 10 SP3.5 provides the following capability:

General

- Support for the SBD600, a dual-touch, dual-write SMART Board™ interactive whiteboard.

SMART Notebook 10 SP3.5 Resolved Issues

SMART Notebook 10 SP3.5 resolves the following issues:

General

- Improved object animation.

Mac OS X Operating System Software

- Support for Gallery Setup on Mac OS X 10.5.7 or later.
- Enables you to interact with Gallery's Adobe Flash Player compatible files with a single click.

SMART Notebook 10 SP3

Computer Requirements – Windows Operating Systems

- Pentium III 750 MHz processor or faster recommended
- 512 MB of RAM (1 GB recommended)
- 1 GB free hard disk space for minimum installation (2 GB for full installation with Gallery collections)
- Windows XP or Windows Vista operating system
- Internet Explorer Internet browser 6.0 or later
- Adobe Flash Player 8
- Windows Media Player 9 or later for SMART Recorder
- Microsoft DirectX technology interface 8.1 or later for SMART Video Player

Computer Requirements – Mac OS X Operating System Software

- PowerPC G4 or G5 processors or Intel processors (universal binary)
1 GHz processor or faster recommended
- 512 MB of RAM
- 1 GB of free hard disk space for minimum installation (2 GB for full installation with Gallery collections)
- Mac OS X operating system software 10.4.11 or 10.5.4
- Safari application program 1.3.2 or later
- Adobe Flash Player 10 or later

Computer Requirements – Linux Operating Systems (No Changes)

- Pentium II 450 MHz processor
- 128 MB of RAM (256 MB recommended)
- 185 MB of free hard disk space for minimum installation (800 MB for full installation with Gallery collections)
- Linux kernel version 2.6 or later (2.6.11 or later to use a SMART Podium DT770 interactive pen display)
- X Window System version 11 release 6 (X11R6) or later (must support XRender and Xinerama)
- glibc 2.3.3 (gcc 3.4.2)
- libstdc++6
- GNOME 2.8.0 or KDE 3.3 libraries or later (recommended)
- Red Hat Enterprise Linux 5.1, openSUSE 10.3, Debian 4.0 (Etch) r3, Ubuntu 6.06 LTS or Fedora Core 9

NOTE

For complete specifications, see [document 128254](#).

Current Versions

Operating System	Current Version
Windows operating systems	Version 10 SP3
Mac OS X operating system software	Version 10 SP3
Linux operating systems	Version 10

SMART Notebook 10 SP3 Updates

Highlights – General

- Improved support for handwriting recognition.
- A Clone Page icon is now available for the customizable toolbar.

Highlights – Windows Operating Systems

- Support for Slovak language is added.

Highlights – Mac OS X Operating System Software

- Floating Tools now behaves the same as Floating Tools for Windows operating systems.

Resolved Issues

SMART Notebook 10 SP3 resolves these issues:

- When using the backgrounds and themes feature, backgrounds apply only to the current page.
- When you insert a page, it now inserts after the current page rather than the end of the document.

SMART Notebook 10 SP2 Updates

Highlights - Windows Operating Systems

- SMART Product Update enhancements enable users to update their software without accessing SMART's website.
- Updates to SMART Number Cruncher allow users to use the feature while using SMART Notebook 10.
- Themes feature enhancements include:
 - Users can apply themes without affecting text.
 - If a theme is deleted, users can undo the deletion.
 - Themes are now grouped with backgrounds rather than a separate folder.
- Improvements to object animation include:
 - Users can animate multiple objects at the same time.
 - Users can animate fancy pen strokes.
- Users can add a Clear Page button to the customized toolbar. The button clears all objects from a page.
- Users can add a Show/Hide Alignment button to the customized toolbar. The button toggles object alignment on and off.
- The Essentials for Educators gallery is now called Gallery Essentials, and is the default gallery when SMART Notebook 10 starts.
- Over 1200 new educational clip art images have been added to the gallery.

Highlights - Mac OS X Operating System Software

- New folder structure for installed files make it easier to find executable files.
- Support for Flash objects is enhanced.
- International language support is improved.
- Lesson Activity Toolkit (LAT 2.0) enhancements include:
 - New activities, pages and examples.
 - Links to video tutorials and support materials.
 - Updated random text, group and image picker, score board and note reveal tools.

SMART Notebook 10 SP1 Updates

Highlights - Windows Operating Systems

- Support for Windows XP SP3
- Hand-drawn table recognition
- Toolbar ToolTips
- Close button and auto-hide for contextual toolbar
- Smaller SMART Notebook tabs
- Improved frame-per-second rate for SMART Document Camera
- New default fonts for text tool
- Object animation support in Windows 2000 operating system
- New toolbar buttons
- Import support for .pptx and .flp files

Highlights - Mac OS X Operating System Software

- Hand-drawn table recognition
- New toolbar buttons
- Automatic hiding of the half ribbon
- Support for Mac OS X operating system software 10.5.4

SMART Notebook 10

Highlights

- Improved user interface
- Toolbar customization
- Page grouping
- Customizable themes
- Senteo™ assessment software question insertion
- SMART Document Camera image insertion
- Magic Pen tool
- Table integration
- Locking interactive whiteboard
- Active alignment
- Object animation
- Page recording
- Shape Recognition tool
- Color and gradient fill effects
- Improved spell check (not supported in Linux operating systems)
- Improved SMART Recorder
- SMART Learning Marketplace
- Online Essentials for Educators
- Welcome Center

NOTE

For more information on these changes, see [document 118455](#).

Resolved Issues

SMART Notebook 10 resolves several installation and activation issues:

- You can create an image of the SMART Notebook 10 installation and clone it onto other computers.
- You can enter a valid activation code during the SMART Notebook installation to activate the software.
- On Mac computers, you can drag folders to the trash to remove applications.
- The SMART Notebook installation removes previous versions of Gallery Setup.

Installation Notes

- If you previously installed SMART Board software, remove it before installing SMART Notebook 10.
- If you want to install Senteo software (version 1.0 SP3 or earlier) on the same computer as SMART Notebook, install Senteo software first. If you already installed SMART Notebook 10, remove it, install Senteo software, and then reinstall SMART Notebook 10.
- If you want to install Senteo software (version 1.0 SP3 or earlier) and SMART Notebook 10 on a Mac computer with Mac OS X v10.5 Leopard operating system software, install the software as follows:
 - Install Senteo software first. If you already installed SMART Notebook 10, remove it, install Senteo software, and then reinstall SMART Notebook 10.
 - Install and open SMART Notebook 10 before you install SMART Board drivers 10.
 - If you install SMART Notebook 10 on a Mac computer and an error message appears stating that SMART Notebook is unable to open, reinstall SMART Notebook.
 - If you install SMART Notebook 10 on a Mac computer which has no Internet connection and you want to install Essentials for Educators gallery content, you must install this content manually. Browse to the CD, select **Content > SMART Essentials**, double-click the **SMARTEssentials.gallerycollection** file, and then follow the on-screen directions.

Known Issues – General

- When you install SMART Notebook 10, you can select the option to install the Lesson Activity Toolkit (LAT) and Gallery files. If you select this option, the installation takes more time to complete.
- You're unable to open a spotlight or magnifier using the Magic Pen tool on computers with a 16-bit or lower color quality and running the Microsoft Vista 64-bit or Windows 2000 operating systems.
- If your .notebook file includes gradient or pattern fill effects and you export it as a .pdf or .html file, the exported file may display these fill effects incorrectly.
- You're unable to open SMART Notebook 10 and Number Cruncher 1.1.1.0 on the same computer.
- If you insert a numeric Senteo software question on a .notebook file page, Senteo software can display incorrect results.
- You're unable to use the Print Capture feature if SMART Notebook is already started.
- The only video files you can insert on a .notebook file page are .flv files, even if you install additional encoders to support the insertion of other video file types.
- SMART Notebook doesn't save your animation settings when you close your file.
- Animated notes can lose their original shape.
- You're sometimes unable to retrieve animated objects that move off the side of the whiteboard area.

Known Issues – Windows Operating Systems

- Using the Eyedropper tool causes SMART Notebook to stop responding on computers with a 16-bit or lower color quality and running the Windows Vista 64-bit or Windows 2000 operating system.
- You're unable to use the Print Capture feature on computers running the Windows Vista 64-bit operating system.
- You're unable to use the Page Recording feature on computers running the Windows 2000 operating system.
- You're unable to use the Animation feature on computers running the Windows 2000 operating system.

Known Issues – Mac OS X Operating System Software

- SMART Notebook can close unexpectedly on Mac OS X Leopard operating system software. After it closes for the first time, SMART Notebook can close unexpectedly more frequently.
- If your .notebook file includes gradient or pattern fill effects and you print it, the printed file can display these fill effects incorrectly.
- Adding multiple Adobe Flash objects to your .notebook file can significantly reduce the performance of Mac computers.
- SMART Notebook behaves unexpectedly if you move its executable file to a location other than the **Applications > Notebook Software** folder on Mac computers.

Known Issues – Linux Operating Systems

- You're unable to use the **Lock ALL SMART Devices** feature in the Welcome Center in the Linux operating systems.
- When you select digital ink in SMART Notebook, the *Properties* tab doesn't display available properties for the digital ink.
- The auto-hide feature doesn't work correctly in the Linux operating systems.
- When you attempt to move or resize digital ink in SMART Notebook using a Symposium interactive pen display, the changes to the digital ink don't display until you lift the pen.
- If you attempt to start SMART Notebook from the digital ink layer and SMART Notebook has not yet been activated, the digital ink layer blocks the evaluation dialog box.
- The *Description* tab in the *About SMART Notebook* dialog box is available only in English.
- The Magic Pen floating tool doesn't work as expected. Ink doesn't fade, and when you draw a box, the contents of the box aren't magnified.
