

## Knowledge Base

# Determining Whether Your SMART Response System Supports 40 or 60 Clickers

### SMART Software

All versions of SMART Response assessment software

## Overview

If your receiver's model number is 1.1.3, your system supports up to 60 clickers. If your receiver's model number is 1.0.19, your system supports up to 40 clickers.

## Details

To determine whether your SMART Response system operates with 40 or 60 clickers, locate your receiver's model number found in Teacher Tools or Senteo™ Manager.

### To open Teacher Tools or Senteo Manager

1. Connect your receiver to your computer.  
Your SMART Response system automatically activates.
2. Click **SMART Response** in the notification area (for Windows computers) or the Desktop Menu (for Mac computers).
3. Click the field below **Configure Hardware**.  
Teacher Tools or Senteo Manager appears (depending on your software version).

### If Teacher Tools appears

1. Click **Devices**.  
The *Devices* screen appears.
2. Click **My Receiver**, under **Devices**.  
Your receiver's model number appears.

**If Senteo Manager appears**

---

Click the **Receivers** tab.

Your Model number appears to the right of **Make**.
