

# Touch Resolution for SMART Board™ for Flat-Panel Displays

**Applies to:** SMART Board™ for Flat-Panel Displays interactive overlays and Actalyst™ interactive digital signage

## Overview

This document describes touch resolution and the level that you require.

## Details

Touch resolution is the level of precision available for touch control. Most flat-panel displays have a screen resolution of 853 x 480 or 1365 x 768. The Actalyst interactive overlay has a touch resolution of 2000 x 2000, which is higher than the screen resolution currently provided by any flat-panel display. Anything more than this level of touch resolution is not required.
